

## **Senior Geotechnical Engineer**

### **Opportunity**

Conquest Engineering Ltd. is an employee-owned engineering consulting firm and a regional leader in Atlantic Canada in geotechnical engineering, construction quality assurance/quality control and materials testing services. Our specialized team of engineers and technical support personnel offer services to a diverse client base in the heavy industrial, civil, transportation, commercial, institutional, and residential sectors.

As a member of the Conquest Engineering Ltd. team you will receive an attractive compensation package that includes excellent health benefits, a savings plan, a competitive salary and an opportunity to participate in Company ownership through share purchase arrangements.

Conquest is currently searching for a Senior Geotechnical Engineer for our Bedford, Nova Scotia office. Reporting to the Regional Manager and working closely with the Conquest Team, the successful candidate(s) will assume a leadership role within the organization.

### **Responsibilities**

- Manage geotechnical projects and provide technical leadership including the development and implementation of geotechnical field and laboratory programs including the budgeting and scheduling of technical field staff;
- Provide senior technical review and act as senior project director on geotechnical projects;
- Evaluate and assess geotechnical conditions and provide input to the design of shallow and deep foundations, retaining structures and earth structures;
- Identify and lead project opportunities and participate in regular Business Development activities including the preparation of proposals;
- Mentor and coach junior and intermediate level staff members;
- Develop and maintain strong client relationships;
- Communicate well with clients and sub-consultants;
- Participate and show commitment to Conquest's health and safety program;
- Provide leadership in safety in the workplace.

## **Qualifications**

- Minimum of an Undergraduate degree in Geotechnical or Geological Engineering;
- A minimum of 15 years' experience in a geotechnical engineering capacity;
- Registered (or eligible for registration) as a Professional Engineer with the Association of Professional Engineers of Nova Scotia (APENS);
- Experience in a consulting engineering environment would be an asset.

## **Preferred Skills**

- Excellent English oral and written skills;
- Strong analytical, project management and report writing skills;
- A high level of proficiency with current geotechnical software applications;
- An individual with a good business acumen and experience in establishing and maintaining good client relationships;
- Strong organization, interpersonal and communication skills (written and verbal) and an ability to work in a team environment including mentoring and coaching team members;
- Valid Nova Scotia Driver's License (or eligible).

## **Additional Information**

- Only qualified candidates will be contacted.
