

Conquest Engineering Ltd. is seeking an **Intermediate Materials Engineer** to join our team in the Halifax Regional Municipality (HRM). This is an excellent opportunity to work on a variety of interesting and important projects in one of Atlantic Canada's most progressive cities. Conquest provides geotechnical engineering and materials testing services to a wide range of clients throughout Atlantic Canada. The employment opportunity is at our Bedford office/soil & materials laboratory.

As an Intermediate Materials Engineer, you will play an important role in day to day operations, assisting in providing management and leadership to a team of technical staff. This will include managing, conducting, and reviewing materials investigations, assessments, designs, and reports, as well as preparing proposals, aiding in retention of long-term clients and building new business opportunities. The work will involve guiding internal team members and coordinating work with clients.

We're interested in candidates with an undergraduate or graduate degree in Civil Engineering from an accredited university, and five (5) to ten (10) years of relevant work experience since graduation. The position requires a keen interest in:

- growing Conquest Engineering as a company,
- materials engineering in the fields of concrete and asphalt technology,
- technical, organizational and project management skills,
- verbal and written communication skills.

Our Profile:

Conquest Engineering Ltd is a locally owned and highly experienced geotechnical and materials engineering consulting firm in Atlantic Canada. From our beginnings in 2003 we have grown to become a leading regional provider of these engineering services to the commercial, institutional, heavy industrial, transportation, municipal infrastructure, utilities, and large residential sectors.

Who we work with:

Conquest's client base consists of multi-disciplinary engineering firms, heavy industry, architectural firms, federal, provincial, and municipal government sectors, developers, and contractors.

Our services include:

- Geotechnical investigations
- Geotechnical engineering design
- Concrete and asphalt technology and materials engineering
- Consultation during tendering
- Construction monitoring and on-site engineering assistance during construction
- Construction Quality Assurance/Quality Control
- Materials testing of soil, concrete, asphalt and construction aggregates.

Our testing laboratories are certified to CSA Standard A283 through the Canadian Council of Independent Laboratories (CCIL) and are all equipped for soils, concrete, and asphalt testing.

Conquest Engineering employs personnel at competitive salaries and benefits that are consistent with the engineering industry. Total compensation will be discussed with candidates during an interview process. Interested candidates in this opportunity should provide a cover letter and resume to:

Conquest Engineering Ltd.
575 Crown Street
Saint John New Brunswick
E2L 5E9
